

## ISOL Isolation Salt

For indoor application, especially for gypsum plasters

**Scope of application:** Isolation especially for gypsum plasters on walls and ceilings in the interior zone. The product is usable for restoration against water spots, nicotine stains and smuts, with moisture-controlling properties and it is protective against efflorescence. Well-insulated surfaces require less paint. No sagging of the wallpaper paste.

**Properties** Isolation, priming  
especially for gypsum plasters / gypsum plaster boards

**Technical specifications:** Raw material base: aluminium sulphate  
Make-up ratio: Add 100 g to 500 ml water  
Consumption: 100 ml/m<sup>2</sup>

**Processing:** Clean the surfaces thoroughly, remove the loose plaster parts. Allow the existent stains to dry completely. Dissolve 100 g of Isol Isolation Salt in 500 ml water, apply it with a brush or lambs-wool roller. After drying, brush away the remaining salt particles or wash the surface with clear water. As soon as the surface has dried again, you can start with the follow-up work.

Protect the surfaces that are not acid-resistant (e.g. glass, marble, metal, enamel and plants, etc.) from splashing, or clean immediately with water, if required.

Always clean the tools thoroughly with water immediately after use.

**Identification:** Please refer to the EC safety data sheet for the pertinent information.

**Storage property:** Store the product in a cool, dark and dry place.

**Other:** Always read the label and product information before use.

Always test the compatibility at an unobtrusive point.

**Container sizes:** Folding box with 200 g  
Folding box with 500 g  
Plastic bucket with 5 kg
