

Fungi Remover – chlorine-free

Fungi remover – chlorine-free with long-term fungicides

Scope of application: The Fungi Remover – chlorine-free has a wide range of efficacy and removes fungi, bacteria and blue mold on walls, ceilings, facades, flagstones, tiles, gravestones and fabrics without any odour nuisance.

Properties: Odourless;
convenient for food processing companies;
with long-term protection against reinfestation.

Technical specifications: Raw material aqueous solution consisting of disinfectants and surfac-
base: tants

Make-up ratio: undiluted

Consumption: 120 ml/m²

Processing: Do not remove the layer before in order to prevent the fungi spores from disspreading. Spray the surface to be treated generously from a distance of about 15 to 20 cm and allow it to react for at least 3 hours. Repeat the procedure, if required. Rewash the residues with a sponge and water.

Always clean the tools thoroughly with water immediately after use.

Identification: Please refer to the EC safety data sheet for the pertinent information.

Storage property: Store the product in a cool, dark and dry place.

Other: Always read the label and product information before use.

When using biocides always ensure their safe handling.
Make sure you have read and understood the product information before use.

BauA-Nr.: N 74085 (hazardous material information).

Container sizes: Aerosol can with 500 ml
