

Cleaning Concentrate for Facades and Stone Surfaces

The Cleaning Concentrate for Facades and Stone Surfaces is universally applicable on stone facades that are acid-sensitive or show an alkaline reaction. The product is biodegradable.

Scope of application: Cleaning Concentrate for Facades and Stone Surfaces for a thorough cleaning of facades and stone surfaces showing any kind of heavy contamination. The concentrate is slightly alkaline and non-corrosive. Glass surfaces etc. do not have to be covered. The product can be used indoor and outdoor.

Properties: Degreasing, highly dirt dissolving, very well biodegradable, non-corrosive

Technical specifications: Raw material aqueous alkaline solution containing anionic and non-anionic surfactants, phosphate and additive substances

Make-up ratio: depending on the contamination 1:1 up to 1:8

Consumption: 100 - 120 ml/m² of the prepared stock solution

Processing: Dilute with water depending on the contamination 1:1 up to 1:8. Spray the product on the dirt or use a sponge or ceiling swab for applying. Rewash with clear water after a reaction time of 20 to 30 minutes. Pre-wet highly-absorbing surfaces.

Always clean the tools thoroughly with water immediately after use.

Identification: Please refer to the EC safety data sheet for the pertinent information.

Storage property: Store the product in a cool, dark and dry place.

Other: Always read the label and product information before use.

Very well biodegradable (after 6 days = 97 %).

In order to find out the appropriate dilution grade, it is good practice to carry out cleaning tests at an unobtrusive point.
